Company Overview

PRL Logistics are a leading end to end logistics business providing an industry leading service to some of the UK's best known brands.

We have a forward thinking approach to innovation, supporting our clients global sourcing and Net Zero ambitions via a consolidated reverse logistics solution.

Long-standing partnerships with blue chip companies is testament to our ability to deliver a consistently high standard, identifying us as the partner of choice for our clients.

We work with our partners to support their GNFR global sourcing supply chain by providing an end to end logistics solution including warehousing, distribution, asset recycling and installation services.

As part of the Fit Out UK group of companies, we benefit from a long established global supply chain and a robust financial standing.

Facilities

Operating over 400,000 sqft of strategically located warehousing space in Barnsley, Doncaster, Sheffield and London, we provide a nationwide UK distribution service and a range of storage options including racked facilities, bulk storage, bonded warehousing and external container storage. All our services are supported by state of the art warehouse management and security systems.

In addition, our in house vehicle fleet and bespoke route planning systems ensure we deliver on time, every time.

In-house Transport

Our modern and flexible vehicle fleet ranges from small urban vehicles all the way up to 44 tonne artics, complete with vehicle mounted forklifts facilitating multi-drop, out of hour deliveries.

All vehicles are fitted with four way camera systems helping to maximise safety and compliance. By utilising the latest PDA technology, we are able to provide our Clients' access to real time POD data via a dashboard portal.

Container Services

From collection to final destination, our container transport specialists cater for all client requirements. We offer a wide range of container services, operating from our lifting and storage depot in Doncaster. Ideally located close to key rail freight and road networks, we utilise our fleet of vehicles to collect and deliver nationwide, 24/7.

Asset Refurbishment

As part of the Fit Out UK group of companies we are able to utilise in-house manufacturing capability to re-work Client assets.

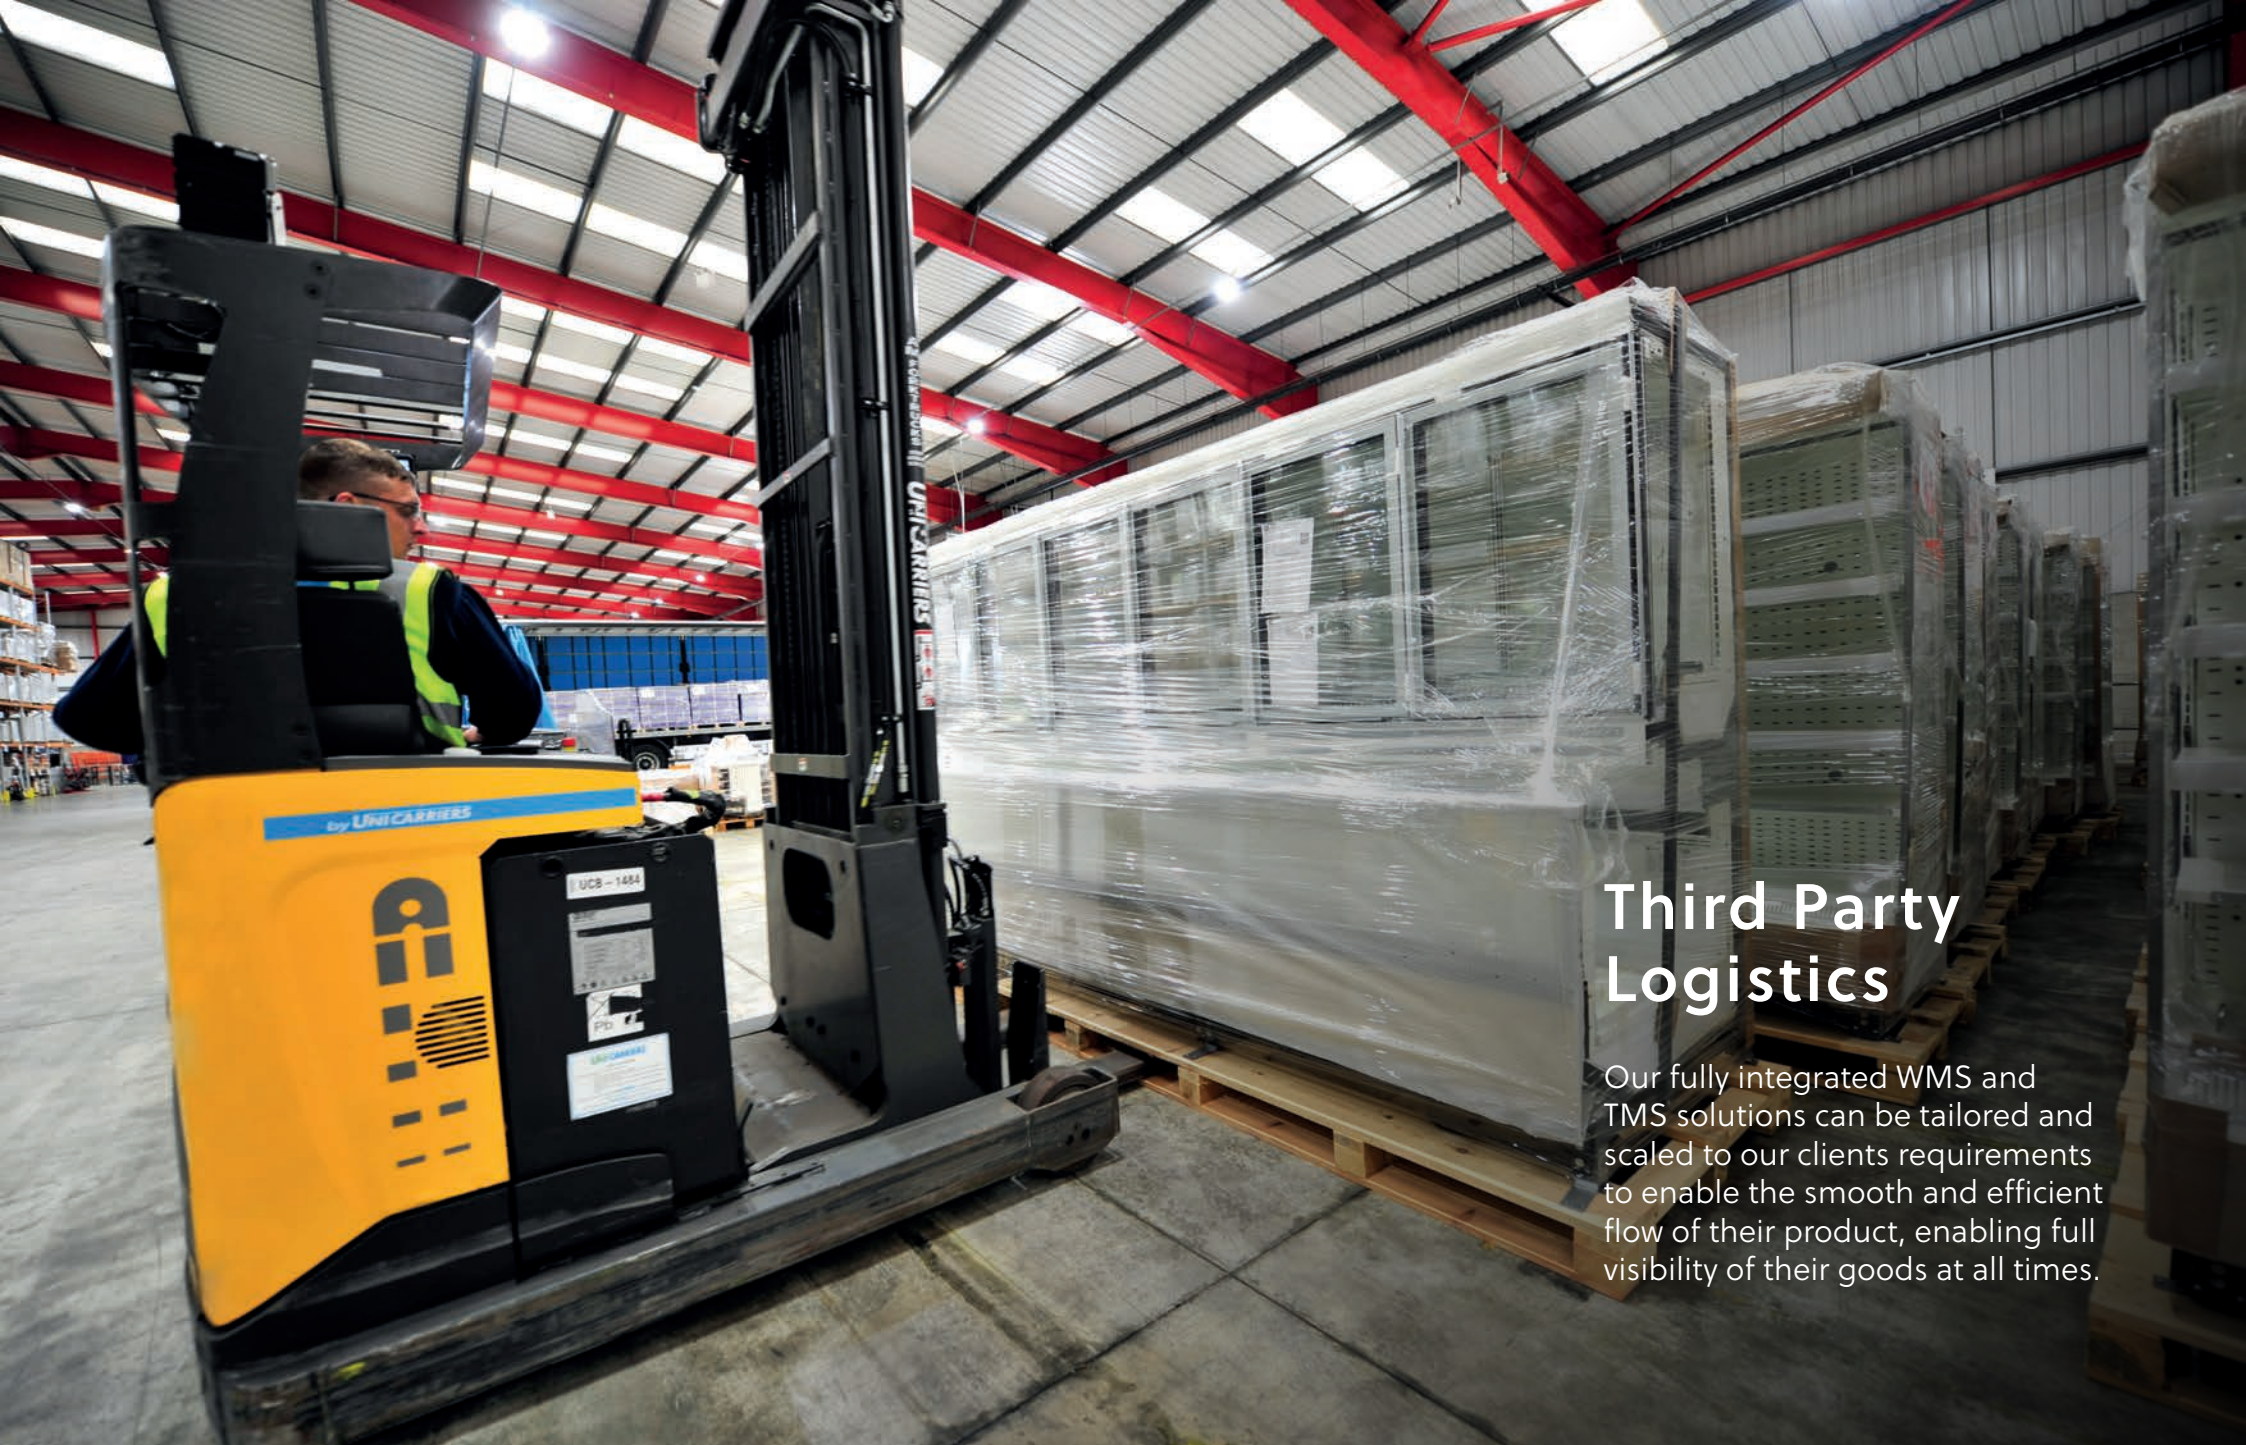

This added value service is further enhanced by a dynamic reverse logistics transport strategy supporting a cost effective and sustainable asset refurbishment solution.

Sustainability

PRL Logistics are committed to supporting our clients' net zero targets with consolidated deliveries, greener transport, and asset reuse & recycle initiatives.

Our investment in sustainable modes of transport includes double-deck trailers generating 35% more capacity and 10% more fuel efficiency, complimented by battery-powered vehicle-mounted forklifts reducing noise and carbon pollution.

Our container freight trans-shipment service and UK-wide consolidation centres play a vital role in supporting our clients' Net Zero targets. We optimise routes to minimise the number of vehicles needed for transportation, saving over 100,000 miles and 150 tonnes of carbon emissions per year.

Third Party Logistics

Our fully integrated WMS and TMS solutions can be tailored and scaled to our clients requirements to enable the smooth and efficient flow of their product, enabling full visibility of their goods at all times.

Relocation

Working with some of the UK's best known leisure brands, we provide support services for corporate events and office relocations.

We understand the importance of Client engagement and communication, and our experienced 'move managers' are on hand to co-ordinate our team of operatives to help ensure Clients expectations are met on every project.
